The energy efficient Linear High Bay Titan LXs™ Series is designed to give an extremely convenient LED solution to replace fluorescent and HID systems. With the enhanced benefits of LED lighting, such as higher energy savings, extended system life, and reduced carbon footprint.

The latest LED technology makes this a high-performance quality luminaire, Everlight LED modules offer exceptional optical performance, an outstanding 130 l x w makes the Titan LXs™ Series one of the most efficient High Bays in the industry.

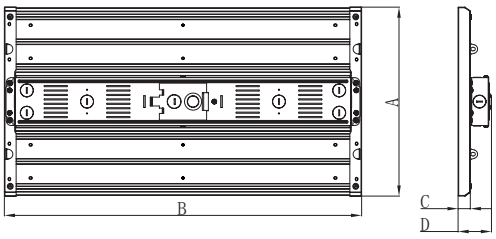

Luminaire housing made of die-formed code-gauge cold-rolled steel. Powerful LED modules mounted to housing surface and drivers mounted in separate compartment to minimize heat. For more demanding environments, Titan LXs™ offers optional wire guards. Suited for suspension mounting with chain set.

The Titan LXs™ gives you more, with UL constant current flicker free driver, 1-10V dimmable and 3kV surge protection, providing additional energy savings when utilizing PIR and Microwave Motion Sensors.

The Titan LXs™ is ideal for a wide variety of applications: warehousing, gymnasiums, and convention centers and other large indoor spaces with mounting heights up to 50 feet.

Precision-designed optics, and a choice of lumen outputs make the Titan LXs™ Series the energy-efficient solution for industrial and commercial applications.
